MEMORANDUM FOR: Deputy Project Director

THROUGH : Project Director of Administration (WJ)
SUBJECT : Destruction of Waste Film at Hycon Manufacturing Company

1. It was recently brought to the attention of this office that a large quantity of waste film has accumulated at Hycon. Further, due to local fire control measures it is impossible to destroy this film by fire as previously planned. It is not economical to ship it elsewhere for controlled destruction.

2. Hycon officials have suggested this film be disposed of by packing it in weighted 50 gallon drums that will be dropped in the open sea off the Los Angeles coast line. The drum tops will be welded and holes drilled in the sides to expose the material to the destructive action of salt water. [REDACTED] of Hycon has an appropriate maritime master's license and will arrange to rent a boat for this purpose. 25X1A5a2

3. The Office of Security has no objection to this method of destruction, and I propose project concurrence. The packing, loading, and disposal of this film will be witnessed by [REDACTED] our West Coast representative. The disposal of the waste material now in storage at Hycon should take place in the very near future. 25X1A9a
